

## Pima Community College's Multiple Measures Placement Process

Our new placement process will look at your high school transcript and/or any test scores (SAT/ACT/AzMerit/GED) you may have from the last three years. If you have a grade point average  $\geq 2.50$ , we will start with multiple measures placement. Please call a Pima Community College Advising Center to set up an appointment and plan to bring copies (unofficial is fine) of your documents to determine placement in math, reading, and writing.

The tables below describe the placement levels based on the evidence. Any one column can be used to establish placement. The scores represent the minimum value required for placement in the respective course.

If the multiple measures placement level is lower than you believe you are prepared for, prepare for and take the Accuplacer tests to increase placement. The College will use whichever method provides a higher placement.

If your data does not fit the three year pre-requisite required, or your high school efforts do not meet the minimum values from above, then you will need to prepare for and take the Accuplacer placement test\*. The steps are outlined below:

- Complete the Pre-Placement Tutorial ([MyPima](#), New Students, Step 2, First Bullet)
- [Prepare](#) for the Accuplacer tests by practicing
- Visit any campus [Testing Center](#) to complete the Accuplacer (first two attempts are free)

\*Several certificate programs do not require placement tests. You can find a list of these programs on our [website](#) (scroll down to the last paragraph).

High school coursework that includes courses where the student received modifications, as defined by Arizona's Department of Education (<http://www.azed.gov/specialeducation/resources/key-definitions>), will not be included in this process.
